PROFESSIONAL SUMMARY

Results-driven Junior Software and Full-Stack Web Developer with a perfect 4.00 CGPA and hands-on production experience delivering applications across the complete SDLC. Skilled in algorithm design, debugging, troubleshooting, REST API integration and building scalable software across mobile and web platforms using PHP, JavaScript, TypeScript and Next.js. Awarded Best Overall Project (JTMK ICE I 2026/2027) from 40+ teams, 3rd place at Digitech Nusa 2026 Hackathon and 4th place at Huawei x UMPSA Mobile Apps Hackathon 2025 (100+ teams). Holds CompTIA Security+ certification and actively seeking a Junior Software Developer, Full-Stack Developer or Web Developer role.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, TypeScript, Python, C++

Frameworks: Next.js, Bootstrap, Flutter, Android SDK

Libraries / UI: Tailwind CSS, React

Databases: PostgreSQL, MySQL, Firebase (Realtime DB, Authentication)

Tools & DevOps: Jest, Git, GitHub, VS Code, Android Studio, Vercel

Competencies: SDLC, REST API Design, Algorithm Design, Debugging & Troubleshooting, Full-Stack Development, UI/UX, Technical Documentation, Information Security

PROJECTS

CareLink+ — Android Mobile Application

Feb 2026 – May 2026

Tech Stack: Java • Android Studio • Firebase • REST API | github.com/izzxrith/carelinkapps

Best Overall Project, JTMK ICE I 2026/2027 — Ranked #1 out of 40+ teams

- Architected and delivered a full Android mobile application across the complete SDLC from requirements gathering and system design through to testing, debugging and deployment.
- Engineered a real-time health monitoring pipeline integrating wearable smartwatch sensor data with predictive algorithms, enabling early risk detection for special needs students and replacing a fully manual care process.
- Built a secure, scalable Firebase backend supporting real-time database synchronisation, multi-role authentication and encrypted data handling across concurrent user sessions.
- Produced end-to-end technical documentation, system architecture diagrams, API contracts and user guides that enable seamless future development and team handover.

FightTrack SaaS — Multi-Tenant Web Platform

August 2026 – Present

Tech Stack: Next.js • TypeScript • Tailwind CSS • MySQL | github.com/izzxrith/fighttrack-saas

- Architecting a SaaS platform for boxing gyms and coaches to manage members, track training performance and handle multi-tenant data isolation. Evolved from the original FightTrack project.
- Designing a scalable multi-tenant MySQL database schema with role-based access control for gym owners, coaches and athletes.
- Building a modern full-stack interface with Next.js App Router and Tailwind CSS, applying production-level component architecture and TypeScript for type safety.

FightTrack — Full-Stack Web Application

2026

Tech Stack: PHP • MySQL • Bootstrap • JavaScript | github.com/izzxrith/FightTrack

- Developed a full-stack gym and boxing training tracker covering the complete SDLC from requirements and database schema design through to front-end delivery.
- Designed a normalised MySQL relational database to manage training sessions, performance metrics and fight records with optimised query performance.
- Delivered a fully responsive Bootstrap front-end with JavaScript interactivity. Diagnosed and debugged application logic to improve quality and stability.

CareLink+ Promotional Website

Feb 2026 – May 2026

Tech Stack: HTML5 · CSS3 · JavaScript · Bootstrap | github.com/izzxrith/CareLinkPlus-

- Designed and deployed a fully responsive promotional website communicating CareLink+ features and social impact to stakeholders and end users.
- Applied HTML5/CSS3 best practices and JavaScript to deliver a cross-browser-compatible, mobile-first interface.

Personal Portfolio Website

2025 – Present

Tech Stack: HTML · CSS · JavaScript | ayet.me | github.com/izzxrith/izzxrith.github.io

- Designed, built and deployed a personal developer portfolio showcasing projects, technical skills and achievements. Live at ayet.me.

WORK EXPERIENCE

Software Developer (Freelance) | Self-Employed

Jan 2026 – Present

- Building FightTrack-SaaS - a multi-tenant gym management platform for boxing gyms using Next.js, TypeScript, Prisma and Supabase (PostgreSQL).
- Implemented row-level security for per-gym data isolation, Zod validation on all API endpoints and bcrypt password hashing for secure authentication.
- Rebuilt a legacy PHP/MySQL prototype into a modern TypeScript stack, improving type safety, scalability and subscription-readiness.
- Architecting the platform toward public beta launch with coach and athlete workflow, training session tracking and performance analytics.

Software Developer (Internship) | WF Uwais Enterprise

June 2026 – Oct 2026

- Built and shipped production-ready web features end-to-end using PHP, JavaScript, TypeScript and Next.js — spanning requirements gathering, system design, implementation and deployment.
- Translated stakeholder requirements into detailed system flow diagrams and data architecture, cutting rework cycles by eliminating ambiguity before development began.
- Engineered responsive, production-grade interfaces using Next.js and Tailwind CSS and built supporting back-end logic in PHP, directly improving internal workflow efficiency.
- Diagnosed and resolved software defects through systematic root cause analysis, reducing recurring bugs and improving overall application stability across production.
- Authored technical documentation covering system architecture, API contracts and feature handover notes, enabling the team to maintain and extend deliverables without rework.

Administrative Assistant (Part-Time) | CS System Enterprise

Aug 2024 – May 2026

- Managed end-to-end CS system operations - data entry, digital record management and document processing while maintaining 100% record accuracy across daily business transactions.
- Coordinated administrative workflows across departments, streamlining internal communication and ensuring zero operational delays in day-to-day business processes.
- Built Excel-based reports and tracked operational data using internal management tools, supporting data-driven decision-making for management.

Warehouse Assistant | Tiong Nam Sdn. Bhd

Sep 2022 – Sep 2023

- Maintained stock accuracy across a high-throughput logistics operation by managing inventory systems and implementing consistent daily audit routines.
- Collaborated with the operations team to consistently meet daily dispatch targets, demonstrating reliability and performance under pressure throughout tenure.

EDUCATION

Diploma in Information Technology | Politeknik Ungku Omar (PUO), Ipoh

Jan 2024 – Nov 2026

- CGPA: 4.00 / 4.00 — Consistent top academic performance; selected as Valedictorian of graduating cohort.
- Relevant coursework : Data Structures & Algorithms, Object-Oriented Programming, Web Development, Database Management, Mobile Application Development, Computer Networks, Full-Stack Web Development.

ACHIEVEMENTS & CERTIFICATIONS

Best Overall Project — JTMK ICE I 2026/2027	2026
<i>Ranked #1 out of 40+ competing teams across PUO, judged on technical depth, innovation and real-world impact.</i>	
3rd Place — DigiTech Nusa 2026 (Hackathon Category)	2026
<i>Placed 3rd in the hackathon category while PUO achieved the Best Overall Champion.</i>	
4th Place — Huawei x UMPSA Mobile Apps Hackathon 2025	2025
<i>Top 4 finish out of 100+ teams in a national-level mobile application development competition.</i>	
CompTIA Security+	2026
<i>Industry-recognised certification validating baseline cybersecurity and information security skills.</i>	

LEADERSHIP & ACTIVITIES

Programme Director DigiTech Nusa POLYCC Cyber Warrior II Bootcamp 2026	10 June 2026 – 12 June 2026
- Directed end-to-end programme planning and execution for multi-day hackathon bootcamp, coordinating participants, speakers and logistics across 3 days. - Led cross-functional teams to deliver a structured competitive bootcamp experience aligned to the DigiTech Nusa POLYCC Cyber Warrior II 2026 competition.	
Vice Chair (Naib Pengerusi) Digital Technology Club, PUO	Jan 2026 – Jun 2026
- Directed club operations and cross-member communication for the Digital Technology Club, successfully coordinating events and programmes across the membership. - Co-led strategic planning and event execution, delivering all programmes on schedule and strengthening the club's presence within the faculty.	
Programme Director UMPSA x Huawei Mobile App Bootcamp 2025	12 Nov 2025 – 14 Nov 2025
- Directed the planning and delivery of a 3-day mobile app development bootcamp preparing participants for the Huawei x UMPSA national-level competition. - Managed team coordination, session scheduling and programme flow to ensure a structured and high-quality bootcamp experience.	
Competitive Boxer BoxRec: Muhammad Izzarith	2023 – Present
Competing amateur/professional boxer with 3+ years of high-pressure training, discipline, rapid problem-solving under pressure and consistent performance under adversity translate directly into fast-paced software delivery environments.	

ADDITIONAL INFORMATION

Languages: Malay (Native) | English (Professional Working Proficiency)

Target Role: Junior Software Developer | Junior Full-Stack Developer | Web Developer - KL / Cyberjaya / Singapore

Work Arrangement: Open to on-site, hybrid or remote. Available to relocate to Kuala Lumpur / Cyberjaya / Singapore

Availability: Available from November 2026 upon completion of Diploma.
